## Fertilization Guide for CUCUMBER

An easy-care vegetable that loves sun and water, cucumbers grow quickly as long as they receive consistent watering and warmth. Don't let cucumbers get too large before you pick or they will taste bitter! See how to grow and harvest cucumbers.

There are two types of cucumber plants: vining cucumbers and bush cucumbers.

Vining cucumbers grow on vigorous vines shaded by large leaves. The growth of these plants is fast, and the crop yield is abundant if you care for them properly. Vining varieties grow best when trained up a trellis or fence. They will be cleaner often more prolific, and easier to pick.

Bush cucumbers, however, are nicely suited to containers and small gardens. Make successive plantings (every two weeks for continued harvests). In already-warm soil, cucumbers will grow quickly and ripen in about six weeks!

## CUCUMBER (OPEN PLANTATION)

### ■ TO THE SOIL DURING SOIL PREPERITON ■

**Pulcu Leo Bio** 40-50 kg / decare

**Pulcu Excellent 14-12-14+13s** Method Base Fertilization Is Applied 50 kg / decare

#### When Saplings Are Near The Soil

#### From Drip Irrigation to Acre

1	2P AminoMax 45	100 cc
	2P Nano Root	250 cc
	Pulcu Expert 10-52-10+Te	200 Gr (Daily / To Tons)
2	2P Gold Combi	100 gr
	Pulcu Expert 20-20-20+Te	200 Gr (Daily / To Tons)
3	2P BioHumic 25	250 cc
	Pulcu Expert 10-52-10+Te	200 Gr (Daily / To Tons)
4	2P Zinc Edta %15	100 gr
	Pulcu Expert 20-20-20+Te	200 Gr (Daily / To Tons)
5	2P Cytokin	100 cc
	Pulcu Expert 20-20-20+Te	200 Gr (Daily / To Tons)

## Cucumber Foliar Fertilization

To Encourage Flower Development to Acre  
2P Nano Root 250 cc / 100 Lt water

2P Zinc Edta 15% 100 gr

Nano Elite 11-40-10+2,5MgO+Te 250 gr

If Vegetative Reproduction (Green Reproduction) Is Weak to Acre  
2P Nano Root 250 cc / 100 Lt water

2P Gold Combi 60 gr

Pulcu Expert 18-18-18+Te 250 gr

Against Wrinkle Fruits And Softening to Acre  
2P Cal-L 250 Cc/To 100 Lt Water

To Develop The Fruit to Acre  
2P Nano Root 250 Cc/To 100 Lt Water

Nano Elite 17-7-21+6,5CaO+2,5MgO+Te 250 gr

To Enlarge The Fruit to Acre  
2P Cytokin 100 Cc/To 100 Lt Water

Pulcu Expert 7-6-40+Te 250 gr

For Colour And Quality Enhancement to Acre  
2P Nano Tek 250 Cc/To 100 Lt Water

To Ensure That The Plant Is Developing Healthy In Both Vegetative And General Sense 100 Cc 2P Cytokin Should Be Applied To 100 Lt Water With 3 Applications That Should Be Done With An Interval Of 5 Days.

2P Wet Is Fundamentally Required To Ensure That Both The Effects Of Spraying And Foliar Fertilizer Are Maximized And Increased.
